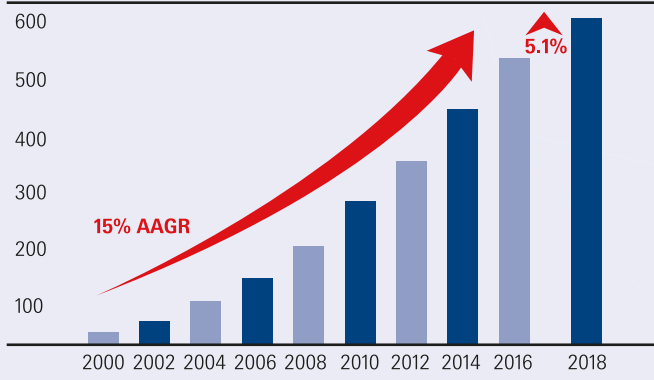

## Exhibit in the heart of the global nonwovens powerhouse

In 2018, China led the global industry in terms of nonwovens product capacity as well as total output. The latter registered **5.93 million tons**, a year-on-year growth of **5.1%**, and accounting for **over 40%** of global production. China surpassed Europe and North America in 2009. Looking forward, and specifically hygiene, waterproof and filtration nonwovens are expected to maintain growth of **over 10%** per year.

In regards to consumption, it is estimated to reach **5.7 million tons** in China in 2019. This figure accounts for **half** of Asian consumption and **over 20%** of global consumption.

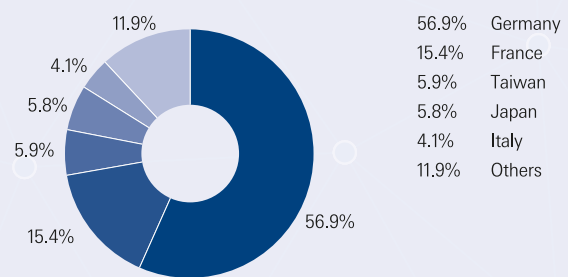

In support of the development of nonwovens production, China has invested heavily in **spunbond, spunlace, needle-punch and air-through production lines**. New lines established in 2018 were 65, 52, 193 and 15 respectively. According to the China Textile Machinery Association, nonwoven equipment imports accounted for USD 98.92 million in 2018, with the top 5 countries / regions being **Germany, France, Taiwan, Japan and Italy**. Germany occupies more than 50% of Chinese **nonwoven equipment** imports.

## Past exhibitor highlights

...and many more

## Exhibitor comments

"This is our 2nd edition at Cinte Techtextil. We met many auto manufacturers coming to learn about our new filter products, and they are quite professional and have clear sourcing targets. Nowadays, environmental protection policies of the Chinese government are becoming increasingly strict, which leads to a rise in demand for filter products, as well as advanced overseas technology and solutions."

**Mr Zhang Meng, Technical Support Engineer, Johns Manville, USA**

"This is our first time at the fair, and it is a good opportunity to showcase our products. We're focused on Chinese buyers, and there's been a lot of people visit our booth. Some have been genuine and interested in buying. We could also meet some overseas buyers here too."

**Mr Frantisek Beno, Executive Head, KOBE-cz, Czech Republic**
